In brief

The bogies start rolling

Gruber Logistics has been contracted to ship around 100 train bogies from Germany to Haifa in Israel. These bogies have a length of 3.80 meters, are 2.8 metres wide and 1.65 metres high with a weight of 6 tons each. All bogies must be packed in wooden cases and loaded on flat racks. Terms of delivery are Delivered Duty Paid (DDP), which means Gruber have to organize clearance and delivery in Israel as well.
